I am currently seeking full-time, part-time or freelance work with a company that can benefit from my professional experience, computer skills and design abilities. Areas of interest include: Graphic design, web site design and development, desktop publishing, art production and prepress.

My qualifications include:

- 10 years of experience working as a graphic designer and production artist.
- The ability to create professional designs, page layouts, graphics and illustrations.
- Extensive experience in preparing content for print, the web, and video.
- Proficiency with Adobe Creative Suite, Microsoft Office and other software applications.
- Strong Photoshop skills: color correction, image retouching, digital compositing, batch processing.
- The ability to build web sites using XHTML, CSS and certain Flash components.
- A full understanding of the offset printing process from layout to final output.
- Skill in trouble-shooting computer issues on both PC and Mac including installing (and uninstalling) hardware and software; able to configure networks, printers, scanners, FTP sites, e-mail, etc.
- An attention to detail, the ability to meet deadlines, and work under pressure.

Besides working with computers, I have great customer service skills and I work well with others. Please visit my web site to download my resume and view samples of my work.

Sincerely,  
Russ Donegan
